To: Green Drain Inc.

Thank you for introducing Green Drain to us. Being an open air brewery, during the summer season we are in a constant battle with fruit flies and mosquitos at and around our floor drains, behind our tasting room bar, as well as our restrooms. Likewise, during the cleaning out of our brewing equipment, we are routinely flushing down fermented malt and barley through our trough drains.

After installing your product in all our floor drains, we could see a noticeable difference in the reduction of fruit fly and mosquito activity. We were also very impressed that the flow rate of our trough drain remained consistent even with the addition of the Green Drain, and that the malt and barley waste passed through easily.

Your product is well made, easy to install, and simple to remove in order to clean. Now I need one for my shower at home. Thank you!

Sincerely,

Mike Malone

Owner and Head Brewer
